

ESD-FLOOR-CLEANER

Special wipe-over care product for the routine cleaning and care of resilient floors

- No negative influence on resistance values
- Easy cleaning of normal contamination
- For basic cleaning and maintenance cleaning

Product description

Special wipe-over care product for the routine cleaning and care of resilient floors. Based on water-soluble environmental friendly care components. Cleans and protects the floor in one step. Creates an anti-slip and satin protective film. Application concentration pH neutral. Can be used in combination with a cleaning machine. Also recommended for the initial protection of structured rubber floors.

Areas of application

Vinyl, linoleum and rubber floors. Complies with the requirements of DIN 18032 for floors in sports areas, gyms, etc.

Method of application

Initial care in high traffic areas

If no polymer dispersion can be used for the initial care of the floor, dilute in a ratio of 1:10 (1l to 10l of water) and wipe over the cleaned floor with the solution. Polish up the resultant protective film with polishing pad or polishing brush.

Consumption: 1l = 50m²

Routine cleaning and care:

Dilute in a ratio of 1:200 (50ml to 10l of water) and wipe over the floor with this solution. Leave to dry remaining moisture. Cleans and protects the floor in one step. The dilution can be increased up to 1:400 (25ml to 10l of water) for grained floors and in cleaning machines.

Consumption: 1l = 1000m²

Note

Regular polishing increases the resistance of the protective coating especially in high traffic areas. Pay attention to exact quantities. Repeated over-dosage or the accumulation of moisture on the treated surface can lead to an increase in surface friction and thus to a reduction in anti-slip qualities.

pH level: Ca. 9,5 (Concentrate)

**Ingredients:**

Less than 5% anionic surfactants.
Contains Benzisothiazolinone, Methylisothiazolinone,
perfumes, Limonene, solvents, care-components
Without silicone

Giscode:

GU 50 (Product code for cleaning and care products)

Storage

Store in a cool, dry place in its closed original container. Keep locked up and out of the reach of children. Protect from frost.

Quality inspection

Certified in Germany by the Otto-Graf-Institute for material testing, University of Stuttgart, section 46 sport floors.

Packaging unit:

5 l canister
